SUMMARY

Cyber Security Analyst with a strong foundation in SOC operations, SIEM monitoring, and malware analysis, complemented by hands on experience in building and utilizing secure malware analysis test beds. Proficient in log analysis, threat detection, and incident response support, with the ability to identify indicators of compromise and assess potential security risks. Demonstrated capability to collaborate in technical teams, document security workflows, and contribute to strengthening organizational security posture in dynamic digital environments.

EDUCATION

VIT Bhopal University

Jul 2023 - Jul 2028

Integrated M.Tech. CSE (Cyber Security)

• GPA: 7.32

Medi-Caps International School, Rao, Indore

Mar 2021

Class XII

Percentage: 75%

SKILLS

- **Cyber Security & SOC:** Computer Forensics, Ethical Hacking, SOC Operations, SIEM (Security Information and Event Management), Log Analysis, Incident Response (Basic), Malware Analysis.
- **Networking & System Administration:** Networking Fundamentals, TCP/IP, Network Monitoring, Linux & Windows Administration, System Configuration, Network Security Basics.
- **Programming & Development:** Python, C++, Java, MERN Stack (MongoDB, Express.js, React.js, Node.js), Web Application Development.
- **Security Tools & Technologies:** SIEM Tools, Malware Analysis Labs, Physical Malware Analysis Test Beds, Security Monitoring Tools.
- **Soft Skills:** Analytical Thinking, Problem Solving, Leadership & Mentoring, Attention to Detail, Team Collaboration.
- **Additional Skills:** Public Speaking, Technical Writing, Research & Documentation.

WORK EXPERIENCE

VMSK Retail

Oct 2022 – Dec 2025

IT Infrastructure & Network Administrator

- Planned and implemented the complete network and IT infrastructure for an e-commerce retail business.
- Designed and deployed LAN architecture, configuring routers, switches, and connectivity solutions.
- Set up secure internet access and basic network security controls.
- Implemented system and hardware infrastructure to support daily e-commerce operations.
- Managed and maintained reliable network connectivity to ensure smooth business workflows.

Cyber Warriors Club VITB

Nov 2023 – Dec 2024

Ethical Hacker | Department Lead

- Led the Ethical Hacking department within the cybersecurity club, coordinating technical activities and team initiatives.
- Conducted live ethical hacking demonstrations during club events to promote practical cybersecurity awareness.
- Organized and delivered hands-on cybersecurity workshops for students.
- Guided members in practical hacking techniques and security fundamentals.
- Played a key role in planning and executing large-scale cybersecurity events and knowledge-sharing sessions.

PROJECTS

Rakshak – Autonomous Security Drone (Ongoing Project) | Drone Systems, Surveillance, Security

Jun 2025 – May 2026

- Designed and developed an autonomous security surveillance drone, handling both drone electronics setup and supporting web-based monitoring interfaces
- Worked on drone control systems, sensor integration, power management, and electronic component configuration.
- Developed and integrated real-time monitoring dashboards using MERN stack for observation and system status tracking.
- Gained hands-on experience in aerial systems, embedded electronics, and full-stack web integration for security-focused applications.

Malware Analysis on Test Bed | Malware Analysis, Cyber Security

Feb 2025 – Nov 2025

- Conducted in-depth static and dynamic malware analysis on multiple malware samples using the established physical lab.
- Analyzed malware behaviour, execution flow, and system impact, including signature and indicator analysis.
- Performed comparative analysis across different malware samples to assess threat characteristics and impact.
- Created structured analysis reports for security assessment and reference.

Setting Up Test Bed for Malware Analysis | Malware Analysis Lab, Cyber Security

May 2024 – Dec 2025

- Designed and built a physical malware analysis lab using a dedicated server and multiple client systems.
- Configured network isolation, controlled connectivity, and monitoring channels between analysis systems and the server.
- Established a secure environment to safely support malware execution, monitoring, and data collection.
- Documented complete lab architecture, setup process, and operational workflow.

CERTIFICATIONS

- **ISC² Cybersecurity Certification:** Jan 2026
- **CAPT - Certified Associate Penetration Tester:** Jan 2026
- **Cyber Security Essentials, Cisco:** Jan 2026
- **Google IT Support Specialization:** Jun 2025
- **Tata Group (Cybersecurity Analyst):** Mar 2024

ACHIEVEMENTS

- Led the Ethical Hacking department at Cyber Warriors Club VITB, coordinating technical teams, conducting live ethical hacking demonstrations, and delivering hands-on cybersecurity workshops to promote practical security awareness.
- National Top 10 Animator (IPRISM Awards 2019), recognized by the Government of India for promoting plagiarism and copyright awareness through creative animation.
- Built and utilized a secure and isolated malware analysis test bed, performing static and dynamic malware analysis, identifying malware behaviour and threat indicators, and documenting analysis workflows while ensuring host system safety.
- Attended in BSides Indore Conference 2023, where I had the opportunity to interact with Carlos Polop, Co-founder of HackTricks, gaining valuable insights into real-world cybersecurity practices and threat research.
- Designed and developed an autonomous security surveillance drone (Rakshak), working on drone control systems, sensor integration, and real-time monitoring for security-focused use cases, gaining hands-on experience with aerial security systems.
